## INTRODUCTION

The State Historic Preservation Office's (SHPO) Advisory Committee on Historical Archaeology and SHPO compiled *Historical Archaeology in Arizona: A Research Guide* to provide information on conducting historical archaeology research in Arizona. It is intended to serve as a resource guide for state and federal agencies and cultural resource management (CRM) firms planning to conduct archaeological, historical, and architectural studies that will be reviewed by SHPO. However, the guide is not a substitute for having a qualified, trained historical archaeologist as a member of the research team. The largest international scholarly society focusing on historical archaeology is the Society for Historical Archaeology (SHA). Information on the SHA and the resources it offers can be found at http://www.sha.org.

This guide is not an exhaustive list of resources available to the researcher and is not a substitute for a thorough search for unique documents and publications related to a specific project area. Rather, it is a list of sources that should be consulted to obtain basic preliminary information. Because each project is unique, resources listed here may or may not be applicable; likewise, additional resources not listed in this guide may need to be consulted to adequately research specific people, properties, or artifacts. These additional resources include CRM reports and a wide variety of published and unpublished sources.

The *Guide* is subdivided into the following major sections: Resources for Researching a Historical Place or Person and five appendixes. Appendix A contains information on historic context studies produced by the Arizona SHPO; Appendix B is a summary table of resources for local history research available at Arizona State Library, Archives and Public Records; Appendix C is a bibliography of research sources on material culture; Appendix D is a bibliography of reports on historical archaeology in Arizona; and Appendix E contains information on historical sources that are housed in the National Archives and Records Administration.

**Members of the SHPO Advisory Committee on Historical Archaeology**
James E. Ayres, Archaeologist, Tucson
Carol Griffith, State Historic Preservation Office
Mark Hackbarth, Northland Research, Inc.
Thomas Jones, Archaeological Consulting Services
Bryan Lausten, Bureau of Reclamation
Teresita Majewski, Statistical Research, Inc.
Morgan Rieder, Aztlan Archaeology, Inc.
Pat H. Stein, Arizona Preservation Consultants
Lyle M. Stone, Archaeological Research Services, Inc.
Michael Sullivan, USDA Forest Service, Tonto National Forest
J. Homer Thiel, Desert Archaeology, Inc.
John Goodman, SWCA, Inc.

**RESOURCES FOR RESEARCHING**
**A HISTORICAL PLACE OR PERSON**

This summary of sources of maps, photographs, and written documents and records in Arizona will be useful to those who are researching the history of places (e.g. mines, homesteads, ranches, roads, urban residences, and businesses) and of the individuals associated with them. The resources in this document are mostly primary sources of information, which are generally archived in public facilities. These sources will be found in federal, state, county, and city locations, as appropriate. Some may be in the hand of private or semiprivate organizations. To further confuse the issue, city and county records may be archived in state and federal repositories. As a matter of course, all primary sources should be subject to external and internal historical criticism prior to use of information found in those sources. For basic discussions of historical method, see Shafer (1980) and Wood (1990).

**Note**: **Periodic updates will be made to this document. If you are aware of any information changes, corrections or additions, please contact Carol Griffith at Arizona State Parks, the State Historic Preservation Office, 1300 W. Washington, Phoenix, AZ 85007, (602) 542-7141, cgriffith@azstateparks.gov**

## Maps

It should be noted that collections at the three Arizona universities, the various divisions of the Arizona Historical Society, and the Arizona State Library, Archives and Public Records include a wide range of map types and subjects that are not specifically listed below. Many of these will be of use to the historical archaeologist.

**General Land Office (GLO) Plat Maps**

A complete set of GLO maps, covering most Arizona townships, may be found at the state office of the Bureau of Land Management in Phoenix. The maps should be reviewed prior to beginning survey fieldwork to guide field investigations and to help identify and interpret cultural features. Specific information about cultural features on these maps may be found in the surveyor's field notes, which are located in the state office on microfilm. Maps date from the 1860s to at least the 1930s. These survey maps were created as desirable land was opened for settlement; therefore, the earliest tend to be where there were mineral deposits or agricultural possibilities. Use maps in conjunction with the surveyor's field notes and the patent filing information (Serial number) to identify the earliest official use/ownership. Be aware that before a patent was issued for a property, squatters and undocumented land use is possible for the nineteenth century, and earlier. Final proofs describing actual improvements to applied land (Homestead files) may be obtained by writing to the National Archives branch office in Laguna Nigel, California. To access the final proof information you will need the patent number, date of action, and serial number, which is available at the BLM office. You will find http://www.glorecords.blm.gov of value for accessing GLO information. To search for Master Title Plates and associated Index Sheets see http://www.blm.gov/az/mtps/mpts_search.cfm Cadastral, Homestead Entry and Mining Survey Maps are available on DVD for purchase from the BLM Office in Phoenix (http://www.blm.gov/az/st/en.html)

**United States Geological Survey (USGS) Maps**

The federal government followed the township-based GLO maps with the USGS quadrangle sheets. Initially, these were issued in a 60-minute format, and later by a more limited 30-minute series. Subsequently, a 15-minute series covering most of the state was prepared. These have all been superceded by the current 7.5-minute series. The earlier series, like the GLO maps, provide a wealth of information about cultural features. Many of the early maps can be viewed at the Arizona State Museum; Special Collections, Cline Library, Northern Arizona University; and

Arizona State Library, Archives and Public Records. In the library at the Grand Canyon Monitoring and Research Center (see below), the USGS maintains the following maps for public reference: 1:24,000 maps for the state of Arizona, 1:250,000 and 1:100,000 maps of the entire United States, and 1:24,000 for some areas in adjacent southwestern states.

**Sanborn-Perris Fire Insurance Company Maps**
The Sanborn maps for Arizona date from 1882 to the 1960s. The earliest Sanborn maps in Arizona are of Tombstone. Sanborn-Perris Fire Insurance Company maps are widely available as microfilm copies from a number of locations. Some are negative views (black background with white lettering), while others are positive views (white background with black lettering). The quality of the copies varies, and it pays to examine several versions if you will be reproducing them in a report. A drawback to using the microfilm copies is that it is not possible to see the color-coding used to designate building materials that are visible on the original maps. Full-size color copies of Sanborn Maps are more difficult to locate. Facilities having these copies are noted below. The Library of Congress has a complete set of the Sanborn maps and may have them on-line in the near future. For information, consult the Library of Congress's American Memory website at http://memory.loc.gov sponsored by E Data Resources, Inc. For more information contact Marla Krauss at mkrauss@CONNIX.COM

**Midvale Collection Maps**
The Midvale Collection is an original set of documents concerning prehistoric and historical-period canals in Arizona. The bulk of this work focuses upon the Salt and Gila Rivers. As of May 1, 1999, this collection was being prepared at Special Collections, Hayden Library, Arizona State University. It cannot be accessed until the inventory and cataloging is completed.

**City Plat/Subdivision Maps**
These are usually available at the County Recorder's Office or city government offices. See listing under **Property Title Records**.

## Photographs

A number of institutions conserve, display, and make available to researchers historical-period photographs. Local historical societies and museums may have resources unique to an area. A useful published source for the Phoenix area (1870–1970) is McLaughlin and McLaughlin (1970).

## Property Title Records

These records are generally located in each county's recorder's office. Some title companies also have older record information they may be willing to share. For Tucson, consult the O'Quinn abstract books (4 vols.) for pre-1940 property transactions (at Special Collections, University of Arizona Main Library) and the Oury Deeds (1862) at the Arizona Historical Society, Southern Arizona Division (Collection M 1072). Some records (e.g. those for Pima County) have been automated and can be accessed on-site. In some cases, it may be useful to have a title search performed by a title company.

Digitized document library of Spain, the United States, and American Frontier

## Census Records

Federal census enumeration sheets listing individuals and their ages, places of birth, occupation, and other information, are available on microfilm at several locations in Arizona. The dicennial census is available from 1860 to 1920. Additionally, special censuses were made in 1864, 1866, 1867, and 1869. The census for 1890 was destroyed by fire in the 1920s. The census Soundex system enables one to locate a particular individual by name without having to resort to a page-by-page search of the enumeration schedules. Using the Soundex system is initially a rather complicated process; we recommend consulting a librarian for assistance. The census schedules are residence based, and if a name is known, but the community in which a person resided is unknown, they are impossible to use. The Soundex system allows the researcher to locate the place of residence when only the name is known.

## Historic Cemetery Records

The State Historic Preservation Office is working with the "Inventory of Arizona Historic Cemeteries Advisory Group to establish a central inventory of historical cemeteries in Arizona. The inventory will provide basic information on the property, such as, location, ownership, dates of use, types of graves, condition of the property, etc. The inventory will not include specific information about who is buried in the cemeteries. Cemetery Inventory Forms are available from the SHPO. The SHPO also has information on cemeteries listed on the National Register of Historic Places.

## Mining Records

Records of mining activity can be found at a variety of state, federal, and county repositories. These records include information on unpatented and patented claims, maps of patented claims, photographs of mines and mining activity, court documents, business records, among other records. Newspapers are also a tremendously important source of information about specific mines and mining districts. The 15 county recorder's offices in Arizona have the only records of unpatented mining claims, which are the most numerous. These are filed and indexed by the name of the claim and by the name of the locator. Published sources are important too, including those of the Mining Club of the Southwest Foundation (Tucson), the journal *Mining and Engineering World,* the *Engineering and Mining Journal, the Mining Congress Journal,* U.S. Geological Survey bulletins, publications by the former Arizona Bureau of Mines, the *Copper Handbook,* CRM reports, and many others.

Provides a list of Patent Classes by Title.

## Court Records

As with many sources of information in Arizona, the researcher frequently finds it necessary to check for civil and criminal court records at more than one repository. These documents include the territorial records of the federal judicial districts and those of the superior courts that were established in 1912 with statehood. Documents related to the appeals and tax courts are also available. Court records can be found in the offices of the clerk of court in all 15 county courthouses; at the Department of Library, Archives and Public Records; at the University of Arizona Law Library; and at the Arizona State University Law Library. Special collections departments at the three state university libraries may also have limited holdings of court records. Appeals court cases are published in Arizona Reports, copies of which are available at the university law libraries, offices of law firms, and at the Arizona State Library, Archives and Public Records. An example of a historical-archaeological report in which court records were extensively used is Ayres et al. (1992).

**Context Studies**

As part of statewide preservation planning, the SHPO prepares historic context studies for major historical themes relevant to Arizona. "Information about historic properties must be divided into manageable units before it can be useful for planning purposes. Major decisions about identifying, evaluating, registering, and treating historic properties are most reliably made in the context of other related properties. A historic context is an organizational format that groups information about related historic properties, based on theme, geographic limits, and chronological period" (Secretary of Interior's Standards). Historic context studies for Arizona are available from Arizona State Parks for the cost of printing and postage. Contexts currently in print and available for purchase from Arizona State Parks include: *Homesteading in Arizona*; *Commerce in Phoenix, 1870-1942*; *Gold and Silver Mining in Arizona, 1848-1945*; *The Chinese in Arizona, 1870*-1950; *The United States Military in Arizona, 1846-1945; Transcontinental Railroading in Arizona, 1878-1940; Prehistoric Rock Art in Arizona, Historic Trails in Arizona from Coronado to 1940*; *Prehistoric to Historic Transition Period in Arizona, circa AD 1519 to 1692*; *Paleoindian and Archaic Sites in Arizona*; *Cattle Ranching in Arizona*; and the *New Deal in Arizona*. The SHPO library has copies of additional context studies that are no longer being printed.

A number of federal agencies, such as, the Forest Service, the Bureau of Land Management and the Bureau of Reclamation and the Arizona Department of Transportation have participated in historic context development and statewide inventory projects.

## APPENDIX A
## Historic Context Studies Available from the Arizona State Historic Preservation Office

| | |
|---|---|
| Prehistoric Water Utilization and Technology in Arizona | $12.00 |
| Homesteading in Arizona | $ 6.00 |
| Commerce in Phoenix 1870-1942 | $6.00 |

[a]Divorce records are found in several record groups including the Territorial Legislature and Superior Courts
[b]Naturalization is administered by Federal District Courts. Before 1920, federal courts delegated this responsibility to various state and county courts.

Compiled by J. Homer Thiel

## APPENDIX C
## Bibliography of Material Culture Sources and Background Resources

This list of sources is intended to provide some basic references on the identification of various classes of material culture found on historical-period sites in the western United States. This list only provides the most basic references (some are cross-listed); it is not exhaustive. To learn more about a particular material class, consult the references cited or bibliographies sections of each of the references. Another way of learning about historical-period artifacts is through museum displays or museum or teaching collections. Use all web sources with caution.

### Bottles, Glass

Anchor Hocking Glass Company

1991 A Revised Set of CC Index Values for Classification and Economic Scaling of English Ceramics from 1780 to 1880. *Historical Archaeology* 25(1):1–25.

Praetzellis, Mary, Betty Rivers, and Jeannette K. Schulz
1983 Ceramic Marks from Old Sacramento. California Archeology Reports No. 22. Cultural Resources Management Unit, Department of Parks and Recreation, Sacramento.

Ramsey, John
1939 *American Potters and Pottery.* Hale, Cushman, and Flint, New York.

Samford, Patricia M.
1997 Response to a Market: Dating English Underglaze Transfer-Printed Wares. *Historical Archaeology* 31(2):1–30.

Stitt, Irene
1974 *Japanese Ceramics of the Last 100 Years.* Crown Publishers, New York.

Wetherbee, Jean
1980 A Look at White Ironstone. Wallace-Homestead, Des Moines, Iowa.
1985 *A Second Look at White Ironstone.* Wallace-Homestead, Lombard, Illinois.

## Coins and Tokens

Michael, Sam
1986 *Trade Token Place Names of Arizona.* Privately published, Mesa.

Thrapp, Dan L.
1977 An Arizona Collector: Taken with Tokens. *Arizona Highways* 53(2):2–11.

Utberg, Neil S.
1963 *Coins of Mexico: 1536–1963.* Privately published, Edinburg, Texas.

Yeoman, R. S.
1964 *A Guide Book of United States Coins.* 17th ed. Whitman, Racine, Wisconsin.

## Firearms

Barnes, Frank C.
1989 *Cartridges of the World.* 6th Rev. ed. DBI Books, Northfield, Illinois.

Hamilton, T. M., and K. O. Emery
1987 *Eighteenth-Century Gunflints from Fort Michilimackinac and Other Colonial Sites.* Mackinac Island State Park Commission, Mackinac Island, Michigan.

Hogg, Ian V.
1982 *The Cartridge Guide.* Stockpole Books, Harrisburg, Pennsylvania.

Kenmotsu, Nancy
1990 Gunflints: A Study. *Historical Archaeology* 24:92–125.

Kent, Barry C.
1983 More on Gunflints. *Historical Archaeology* 17(2):27–40.

Lavin, James D.
1965 *A History of Spanish Firearms.* Herbert Jenkins, London.

Logan, Herschel C.
1959 *Cartridges: A Pictorial Digest of Small Arms Ammunition.* Bonanza Books, New York.

Russell, Carl P.
1977 *Firearms, Traps, and Tools of the Mountain Men.* University of New Mexico Press, Albuquerque. Originally published 1967, Alfred A. Knopf.

Shuey, Daniel
1999 *W.R.A. Co. Headstamped Cartridges and Their Variations,* vol. 1. WCF Publications, Rockford, Illinois.

Steward, Frank
1969 *Shotgun Shells: Identification, Manufacturers, and Checklist for Collectors.* B and P Associates, St. Louis.

Suydam, Charles R.
1979 *U.S. Cartridges and Their Handguns, 1795–1975.* Beinfeld Publishing, North Hollywood, California.

White, H. P., B. D. Munhall, and R. Bearse
1967 *Pistol and Revolver Cartridges, Center Fire American and British Pistol and Revolver Cartridges,* vol. II. A.S. Barnes, New York.

Williamson, Harold F.
1965 *Winchester, the Gun that Won the West.* A.S. Barnes, New York.

Wilson, R. L.
1991 *Winchester: An American Legend.* Random House, New York.

Witthoft, John
1965 A History of Gunflints. *Pennsylvania Archaeologist* 36:12–49.

## Insulators, Glass and Porcelain

Electronic Sources for Insulators

Report No. 93:81. Archaeological Research Services, Tempe.

## APPENDIX E
## Sources for Arizona History in the National Archives and Records Administration

In addition to the numerous in-state records sources, the National Archives and Records Administration (NARA) is an important repository for historical information related to the myriad activities of the federal government. NARA holds many source materials for Arizona and the Southwest, many of which can be of value to the historical archaeologist. The central repositories for the bulk of this material are found in the National Archives Building on Pennsylvania Avenue in Washington, D.C., and the recently opened facility at College Park, Maryland. For those researching Arizona history, it is more important to visit the regional archives branches of NARA at Laguna Niguel, California, and Denver, Colorado. The latter repositories contain most of the federal records relevant to Arizona. The addresses for these locations are listed elsewhere in this document.

Accessing the holdings of NARA is not an overly complex process. However, the assistance of an archivist is usually necessary. Preparation prior to a visit to the archives facility is useful. Listed below are some guides to federal records available at the University of Arizona, Arizona State University, and the Arizona department of Library, Archives and Public Records.

Chadwyck, Healey
1990 *National Inventory of Documentary Sources in the United States.* Teaneck, New Jersey.

Friis, Herman
1974 *Guide to Cartographic Records in the National Archives.* NARA, Washington, D.C.

NARA

1994 *Select List of Publications of the NARA.* NARA, Washington, D.C.

1995 *Guide to Federal Records in the National Archives of the United States.* NARA, Washington, D.C.

1996 *National Archives Microfilm Resources for Research: A Comprehensive Catalog.* Rev. ed. NARA, Washington, D.C.

Szucs, Loretto, and Sandra Luebking
1988 *The Archives: A Guide to the National Archives Field Branches.* Ancestry Publishing, Salt Lake City, Utah.

Tutorow, Norman
1970 *Preliminary Inventory of the Records of the Arizona Territorial Court in the Los Angeles Federal Record Cemter.* NARA, Los Angeles.
